

Asbestos in soils awareness training is required to be given to employees whose work could foreseeably expose them to asbestos. In particular, it should be given to all people employed on projects to redevelop brownfield sites and or sites that have previously been occupied by industrial buildings that have been demolished, where it is foreseeable that their work will disturb the soils and ground on site and may expose them to ACMs that may be present within the soils on site.

The course will also highlight the general precautions that need to be followed to avoid the risks from ACMs in soil in both planned work and in emergencies.

Duration	Certificate	Number of Participants	Delivery	Assessment
Half Day	Valid for 1 Year	Up to 12	Classroom and Practical Instruction	Multiple Choice and Practical

Who Should Attend

Supervisors and trades personnel, including trainees, such as but not limited to: site managers / supervisors / agents, site remediation employees, construction workers, ground workers, plant and machinery operators, utility installers / maintainers and other such professionals.
