

The objective of this course is to provide awareness and develop knowledge amongst employees with regards to the hazards and risks posed by asbestos containing materials (ACM's). The course further gives an overview of the legislative measures in place to permit employees to safeguard themselves and others affected by work activities.

Duration	Certificate	Number of Participants	Delivery	Assessment
Half a Day	Valid for 1 Year	Up to 8	Classroom Instruction	Multiple Choice

Who is it for?

Supervisors and trades personnel, including trainees such as but not limited to: demolition workers, construction workers, general maintenance staff, electricians, plumbers, gas fitters, painters and decorators, joiners, plasterers, roofers, heating and ventilation engineers, telecommunication engineers, fire and burglar alarm installers, computer installers, architects, building surveyors, shop fitters and other such professionals.

What does it cover?

- The Types, Uses and likely locations of Asbestos in Buildings and Plant.
- The Nature and Properties of Asbestos.
- The Health Effects associated with Exposure to Asbestos.
- How to Avoid the Risks from Asbestos.
- How to obtain information on the presence of Asbestos before beginning work on a building.
- What to do in the event of discovering or disturbing materials that are suspected to contain asbestos, including appropriate emergency arrangements.
- An overview of the legislation which deals with health and safety and asbestos in particular.

On completion of the course:

All candidates successfully completing the course in full will be awarded a UKATA Training Certificate.
