

This practical hands-on course is a must for anyone using Abrasive Wheels.

The objective of this course is to provide an understanding amongst employees with regards to the hazards and risks posed by Abrasive Wheel Machines and how to mount discs on portable machines. The course gives an overview of the legislative measures in place to permit employees to safeguard themselves and others affected by work activities. Accident statistics indicate that nearly half of all accidents involving abrasive wheels occur because of an unsafe system of work or operator error.

With regards to Abrasive Wheels, PUWER 98 (The Provision and Use of Work Equipment Regulations 1998) requires, among other things, that all machinery is suitable for its intended use and is properly maintained. All employees including, those using, mounting and managing the operation of abrasive wheels, should be fully informed and trained in their safe use.

Duration	Certificate	Number of Participants	Delivery	Assessment
Half a Day	Valid for 3 Years	Up to 8	Classroom Instruction	Multiple Choice and Practical

### Who is it for?

All personnel who require an understanding of how to safely mount abrasive wheels and discs on portable machines.
